

Creating an Outlook Rule for Email Vulnerability Tests

1. Open Outlook
2. Create a New folder in Outlook (right-click on Inbox and select 'New Folder' and name it CLA Email Tests)
3. Click on File (upper-left)

4. Under the Account Information, click on the "Rules and Alerts" button

Manage Rules
& Alerts

Rules and Alerts

Use Rules and Alerts to help organize your incoming e-mail messages, and receive updates when items are added, changed, or removed.

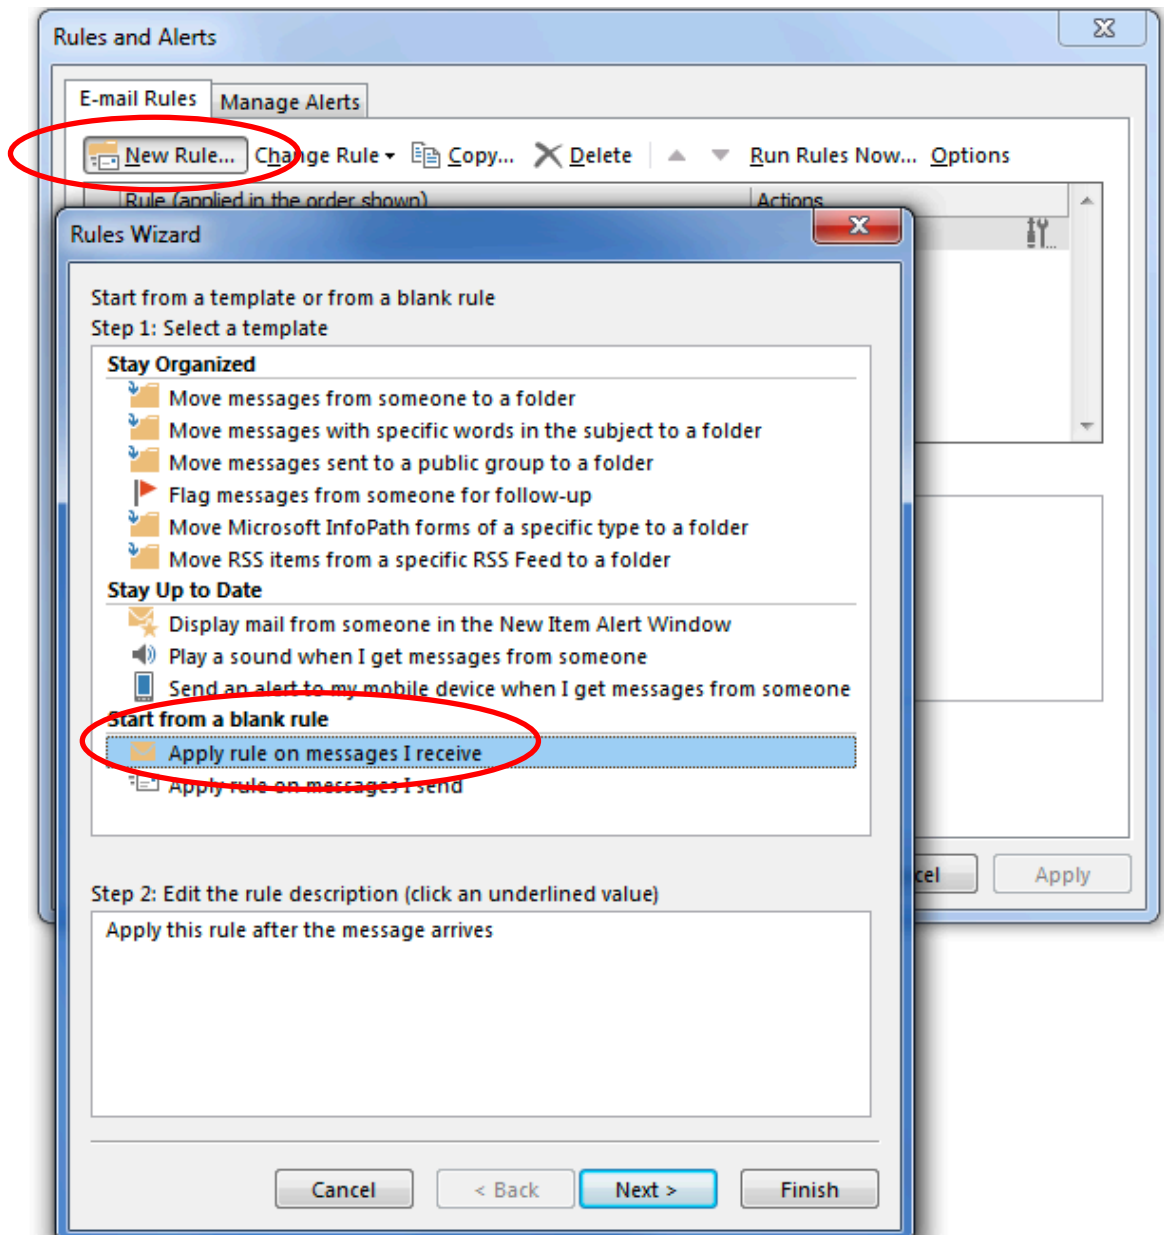

Manage Add-

Manage Add-ins

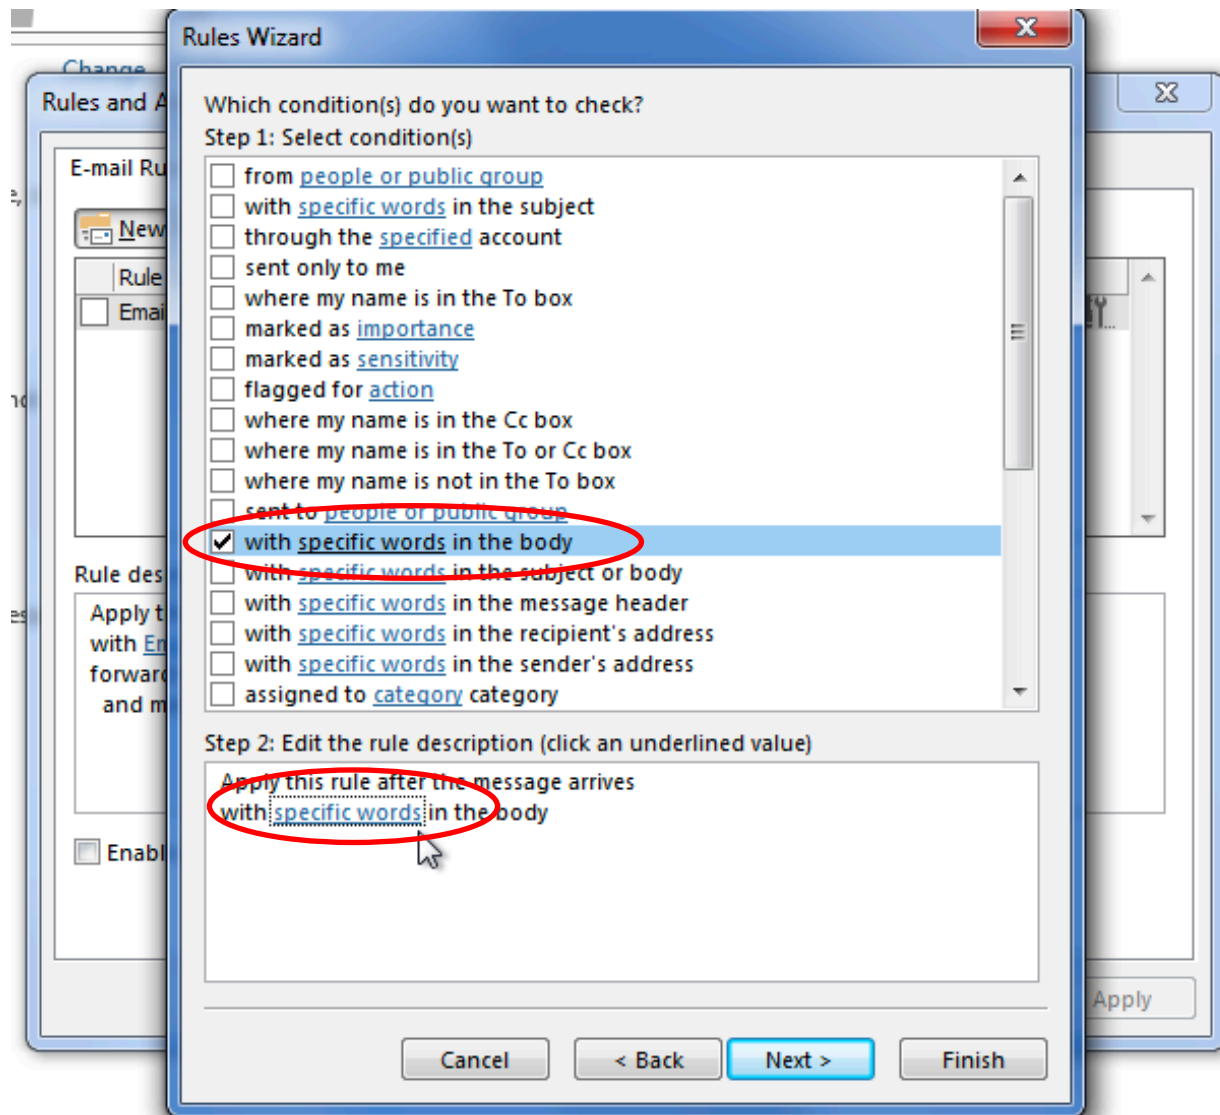

Manage and acquire Web Add-ins for Outlook.

5. In the Rules and Alerts popup window, click on “New Rule”

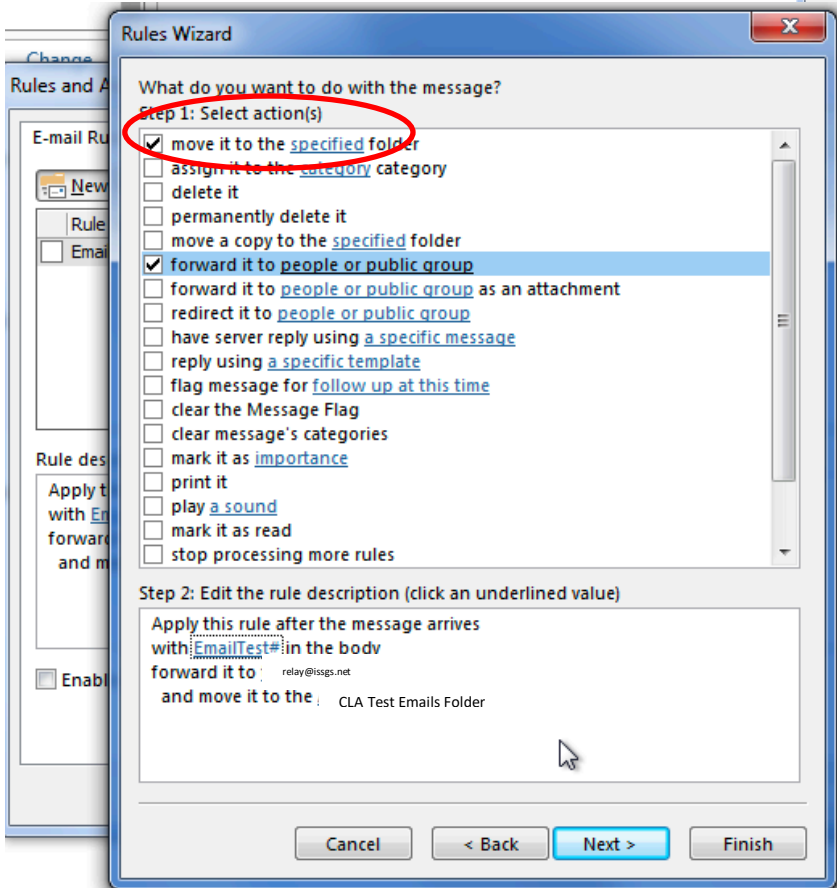

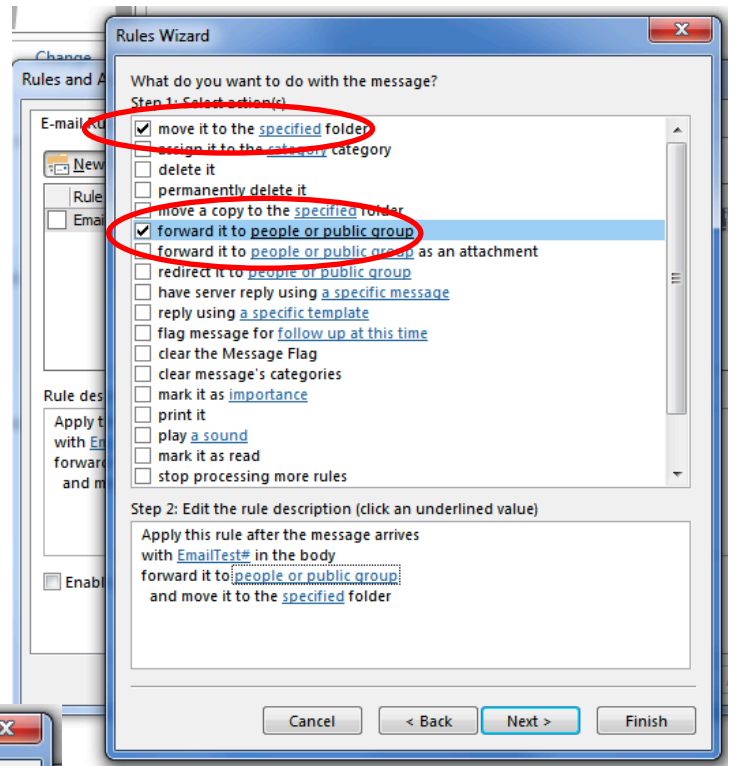

6. In the Rules Wizard popup window, click on “Apply rule on messages I receive”, then hit Next

7. The next window will ask: Which conditions do you want to check?
 - a. Step 1: Check “with specific words in the body”
 - b. Step 2: Click on “specific words”
 - i. In the Search Text popup window type in, EmailTest#
 - ii. click Add and then OK

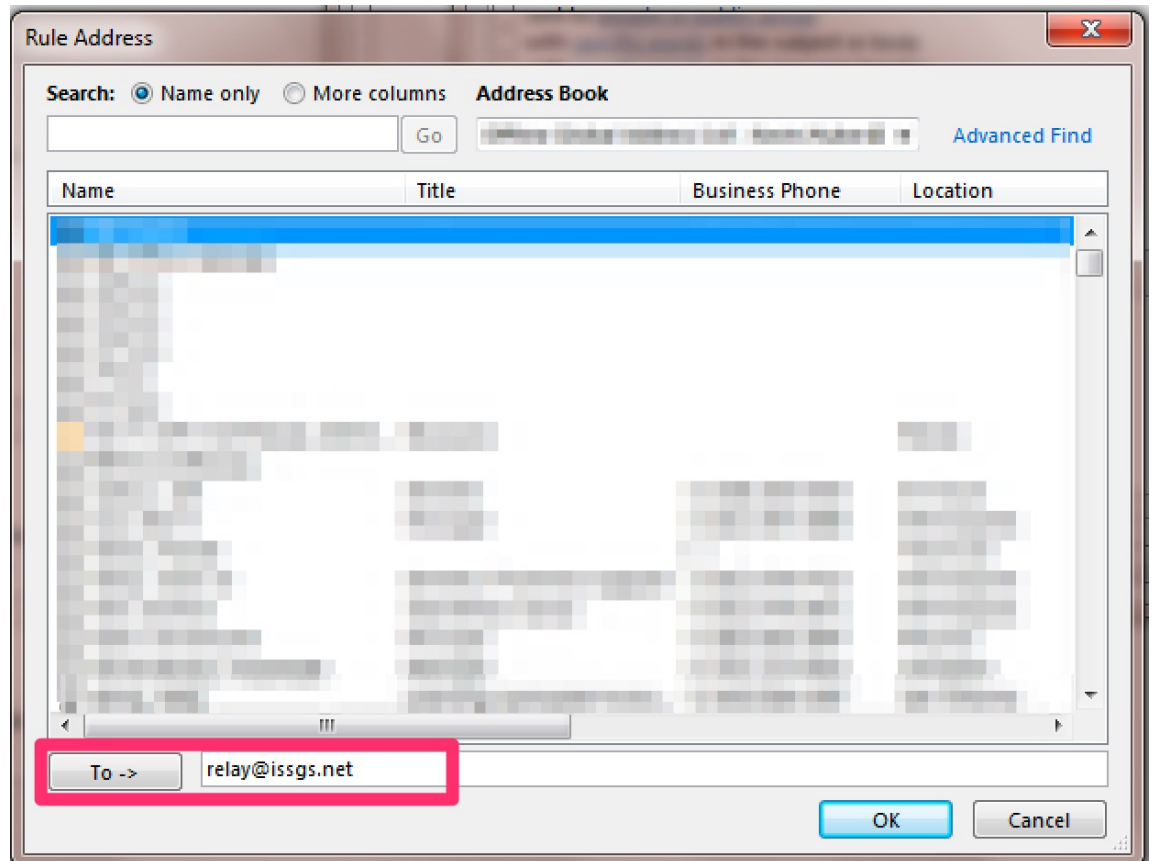

8. Now click Next in the Rules Wizard
9. The next windows will ask: What do you want to do with the message?
 - a. Step 1: Check “move it to a specified folder” and “forward it to people or public group”

b. Step 2:

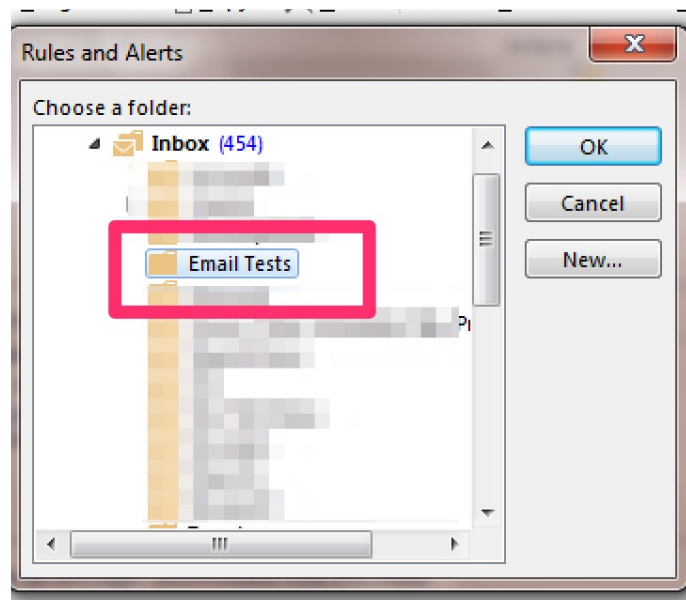

i. Click on “people or public group”

1. In the “To->” text box enter in: relay@issgs.net and hit ok

ii. Click on “specified”

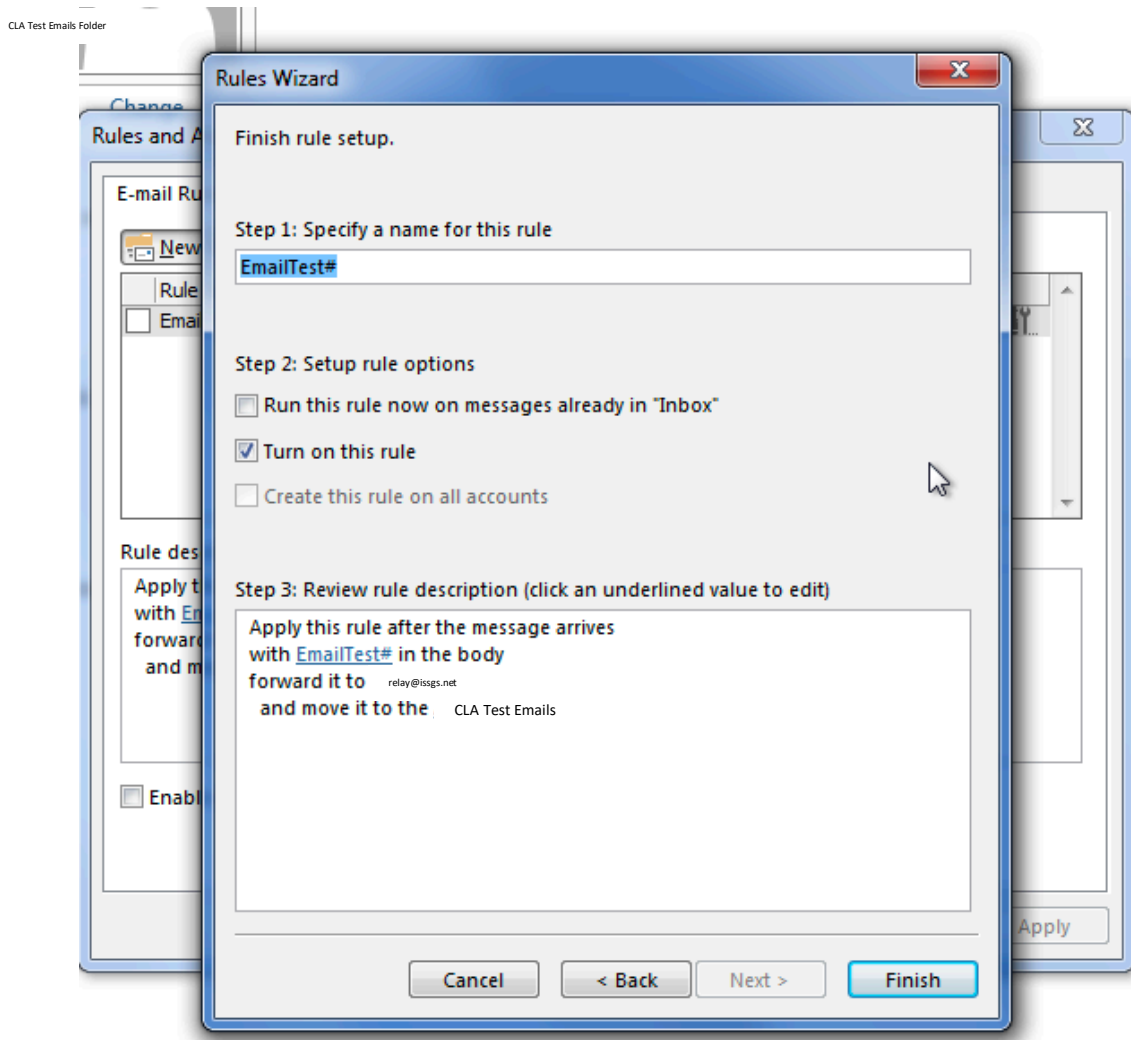

1. Select the folder you created in Step 2 Above and hit OK

10. Hit Next, and Next again (no exceptions needed)

11. In the Finish rule setup:

- a. Step 1: give this rule a name CLA Email testing
- b. Step 2: make sure the “Turn on this rule” is checked and if you created this rule after the email testing was started, then you will want to check “Run this rule now on messages already in “Inbox””

12. Then click Finish and you are done

13. You can close out of any remaining windows
